

ARYA KADAM

Kolhapur, Maharashtra — +91-9834338854 — kadam.arya9058@gmail.com — LinkedIn

Junior DevOps Engineer — Cloud Support Engineer — Junior Cloud Administrator

Professional Summary

Entry-level Cloud & System Administrator with hands-on experience in AWS (EC2, VPC, IAM, RDS, CloudWatch, S3, Lambda, Route53), Linux Administration, Windows Server, Active Directory, DNS, DHCP, and IIS Web Hosting. Skilled in Terraform IaC for automated cloud provisioning and multi-tier application deployment. Proficient in containerization using Docker and Kubernetes, with working knowledge of Jenkins, Git, CI/CD pipelines, Shell Scripting, and Python. Demonstrated ability to build and deploy full-stack applications on AWS using industry-standard DevOps practices. Currently pursuing AWS DevOps Certification.

Experience

Data Engineer Intern – Dataeaze Systems Private Limited

May 2026 – Present

- Working on cloud-based data infrastructure using AWS data services, supporting data ingestion, storage, and pipeline workflows for analytics use cases.
- Assisting in building and maintaining data pipelines leveraging AWS cloud services, ensuring reliable data flow and integration across systems.

Technical Skills

Cloud (AWS): EC2, VPC, IAM, S3, RDS, CloudWatch, Lambda, Route53, CloudFront, ELB, SNS, SQS, DynamoDB, EBS, EFS, AMI, AWS CLI

Infrastructure as Code: Terraform, Cloud Provisioning, Modules, State Mgmt, Remote Backend

DevOps Tools: Jenkins, Git, GitHub, CI/CD Pipelines, Docker, Kubernetes

Operating Systems: Linux (Ubuntu, CentOS), Windows

System Administration: Active Directory, DNS, DHCP, IIS Web Hosting, SSH, Firewall Rules, Security Groups

Programming & Scripting: Python, Shell Scripting (Bash)

Database: MySQL, Amazon RDS (MariaDB)

Monitoring & Security: AWS CloudWatch, Log Analysis, IAM Policies, Cloud Security, Backup & Recovery

Projects

Fresh Grocery Store – Dockerized Flask + MySQL CRUD App

April 2026

Python, Flask, MySQL, Docker, Docker Compose — [github.com](#)

- Built full-stack grocery inventory CRUD app (Fruits, Vegetables, Bakery) using Flask and MySQL, containerized with Docker Compose; persistent named volume ensures data retention across restarts.
- Configured custom Docker bridge network for secure Flask-to-MySQL inter-container DNS communication; MySQL port 3306 unexposed to host; credentials injected via environment variables.
- Implemented MySQL startup retry logic; full CRUD routes with Jinja2 templating and category filter tabs (All/Fruits/Vegetables/Bakery).

Employee Manager – Flask CRUD App with Docker

April 2026

Python, Flask, Docker, JSON Storage — [github.com](#)

- Developed employee records management app using Flask with JSON-based persistent storage; containerized with Docker for zero-dependency cross-environment deployment.
- Implemented add, view, and delete operations with Jinja2-templated UI capturing name, email, department, position, salary, and joining date.

Student Information System – 2-Tier Architecture on AWS with Terraform

March 2026

Terraform, AWS EC2, VPC, RDS (MariaDB 10.6), NAT Gateway, Apache Tomcat 9, Java 17, Python, Bash

- Deployed 2-tier web app on AWS via Terraform IaC – Java/Tomcat on public EC2, MariaDB RDS in private subnet; provisioned full VPC with public/private subnets across two AZs, IGW, NAT Gateway, and route tables.
- Configured security groups restricting DB port 3306 to web SG only; automated EC2 bootstrap to install Java 17, Tomcat 9, and deploy student.war + MySQL connector from S3.
- Used inline Python in Terraform user data to inject RDS endpoint into Tomcat context.xml; managed all config via variables.tf, terraform.tfvars, and output blocks.

Jenkins CI/CD Pipeline – Node.js Static Website Deployment

February 2026

Jenkins, GitHub, AWS EC2

- Built end-to-end CI/CD pipeline with Jenkins and GitHub webhooks to auto-trigger builds on every push; Jenkinsfile with declarative stages: Checkout, Install, Build, Deploy.
- Automated artifact push to EC2 and web server restart; managed credentials and SSH keys in Jenkins credential store for passwordless deployments.

Certification

AWS DevOps – Cloud Computing — Fortune Cloud Technologies Pvt. Ltd., Pune

Oct 2025

- Hands-on training in Linux administration, EC2, IAM, VPC, RDS, Terraform, CloudWatch, system security, automated backups, and CI/CD pipeline fundamentals.

Education

B.Tech – Data Science — Dr. D.Y. Patil Pratishthan College of Engineering

Graduated: June 2025

CGPA: 7.8/10.0 — Coursework: Python Programming, Data Visualization, Database Systems (SQL), Networking

HSC – Science — New Model Junior College

Graduated: April 2021

Percentage: 81.00%
